

TEJAS SOLANKI

Full Stack Developer | Software & AI/ML Developer | Full-Stack Engineer

ITM Skills University '28 | tejassolanki176@gmail.com | [LinkedIn](#) | [GitHub](#)

ABOUT ME

Software & AI/ML Developer with experience building full-stack applications and experimenting with intelligent systems using computer vision and automation. Skilled in the MERN stack and Python, with projects ranging from gesture-controlled gaming to AI-powered proctoring tools. I enjoy building practical solutions that combine strong backend systems, intuitive interfaces, and applied AI. Currently exploring AI/ML, data-driven systems, and scalable architectures.

EXPERIENCE

8bits Technologies – Software Developer Intern Sept 2025 - Dec 2025

- Developed GUI automation solutions for desktop applications using Python and pywinauto library
- Reduced manual work and improved operational efficiency through custom automation scripts for client projects

LetsUpgrade – EdTech Platform Intern Dec 2024 - Jan 2025

- Gained industry exposure to EdTech platform development and user engagement strategies
 - Understood platform design principles, technology integration, and scalability considerations
-

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, Express.js, Flask, REST APIs

Database: MySQL, MongoDB

Programming Languages: Python, Java, C++

Tools & Libraries: MediaPipe, OpenCV, pywinauto, pynput

ACHIEVEMENTS

- Winner – IMAGINE Hackathon (PIWOT 2025), organized by PanIIT Alumni India | Prize: ₹50,000
 - Winner – ITM Buildathon 3.0, College's flagship hackathon | Prize: ₹7,000
 - Awarded Hackathon Champion by ITM Group of Institutions
-

PROJECTS

Gesture-Controlled Combat – AI-Powered Gaming

- Built a gesture-recognition system to play Street Fighter IV without controllers using real-time body movements
- Implemented pose tracking with MediaPipe and webcam input processing with OpenCV
- Used pynput to simulate keypresses and map gestures to game actions (punch, kick, jump, crouch, movement)

SecureExam Lite – EdTech

- Built a browser-based proctoring tool using Flask, MediaPipe, and Computer Vision
- Implemented selfie-based authentication and real-time face activity monitoring

MedRush – Healthcare

- Developed an emergency-care platform featuring a Dark Ambulance model
- Integrated AI-driven symptom checks, doctor connection, and bed reservation system

Recipe AI – FoodTech

- Created a voice-assisted recipe guide in Hindi to promote accessibility in cooking
